

BLACKJACK

BLACKJACK is played with a six-deck shoe, double-deck or single-deck. Rules are dependent on game type, and limits may vary from table to table.

CARD VALUES

- 2 through 10: face value
- All Face Cards: 10
- Aces: 1 or 11

(count Aces as 11, unless it makes a bust)

The objective of Blackjack is for the Player to have the total of his/her cards as close to 21, without exceeding 21, while also beating the Dealer's hand.

- Players receive 3 to 2 odds when dealt a Blackjack – an Ace and a 10 value card – unless the Dealer is also dealt Blackjack – which is a “push” (6 to 5 odds on single-deck).
- When the Dealer shows an Ace, players can buy “insurance” for up to 1/2 of their bet, paying 2-to-1 odds if the Dealer has Blackjack. Even money is not available on single-deck.
- Dealer must hit 16 or less and stand on cards totaling 17 or greater. Dealer must hit soft 17.
- A tie (no win or loss) is called a “push”.
- Players can “double down” after receiving their first two cards by doubling their bet and will receive a single card. Players can only “double down” on two cards totaling “9”, “10” or “11” on single deck and double deck.
- Players can split 3 times for a total of 4 hands, with the exception of Aces which can only be split once.
- All winning wagers are paid even money except Blackjack which pays 3 to 2 on shoe dealt games and double-deck games and 6 to 5 on single-deck games.
